\$1650 4 weeks, space is limited

Sign up and pay In full by June 1st and receive \$150 off

Deadline to sign up: July 1st

Welcome to Performance Pediatrics' 3rd Annual Extended School Year and Summer Camp! Our 4 week, half day summer program is open to all children between the ages of 3-12 years old. We strive to provide your children the skills they need to succeed in all areas of learning and play. We specialize in working with children of all ages who present from mild to severe learning challenges and disorders. We are also able to decode and detect the underlying needs that children display making mastery of skills, or learning new skills challenging. That is why we created a fun, dynamic, multi sensory based summer camp/school program that is appropriate for every child, all ages, learning styles and functional levels!

We have collaborated with a few great teachers, all with experience working with children with alternative learning styles. Our teachers are eager to provide a hands on, and multi sensory approach to learning to achieve academic success. All children will benefit from enhancing gross and fine motor coordination, body awareness and impulse control, visual motor, and attention all while navigating obstacles, going on adventures, creating experiments, and developing self help and coping skills throughout their program at Performance Pediatrics.
